## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 6-8 and 29-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schroeder et al. [US 4,095,205] in view of Fujita et al. [US 4,096,313].

Schroeder et al. discloses a layer insulation system [figure 2] for an oil filled environment comprising:

- a plurality of insulating units [42], each of the plurality of insulating units comprising first and second layers of insulating material;

- at least one of the first and second layers comprising a polymeric material, the insulating units positioned with respect to each other such that the second layer of one insulating unit adjacent to the first layer of another insulating unit, wherein the polymeric material is polyethylene terephthalate.

- wherein the plurality of insulating units terminates at a terminal layer having thereon a third layer [44] of paper insulating material.

- wherein the thickness of the layers from about 0.5 mil to about 20 mil.

Schroeder et al. discloses the instant claimed invention except for the first layer comprises non-polymeric material [or paper insulating material] and the second layer comprises the polymeric material.

Fujita et al. discloses insulation system for oil filled environment comprising first and second layers [A, B], wherein the first layer comprises insulating paper and the second layer comprises polypropylene material.

It would have been obvious to one having ordinary skilled in the art at the time the invention was made to use material of insulating system of Fujita et al. in Schroeder et al. for the purpose of enhancing strength.

#### ***Response to Arguments***

Applicant's arguments with respect to claims 1-4, 6-8 and 29-44 have been considered but are moot in view of the new ground(s) of rejection [note applicant made no argument regarding the 103 rejection, examiner assumed that Schroeder et al. in view of Fujita et al. discloses the instant claimed invention].

#### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 2832

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
